

OMCIT 591 Spring 2019: Shifang Wang and Pammi Yeung

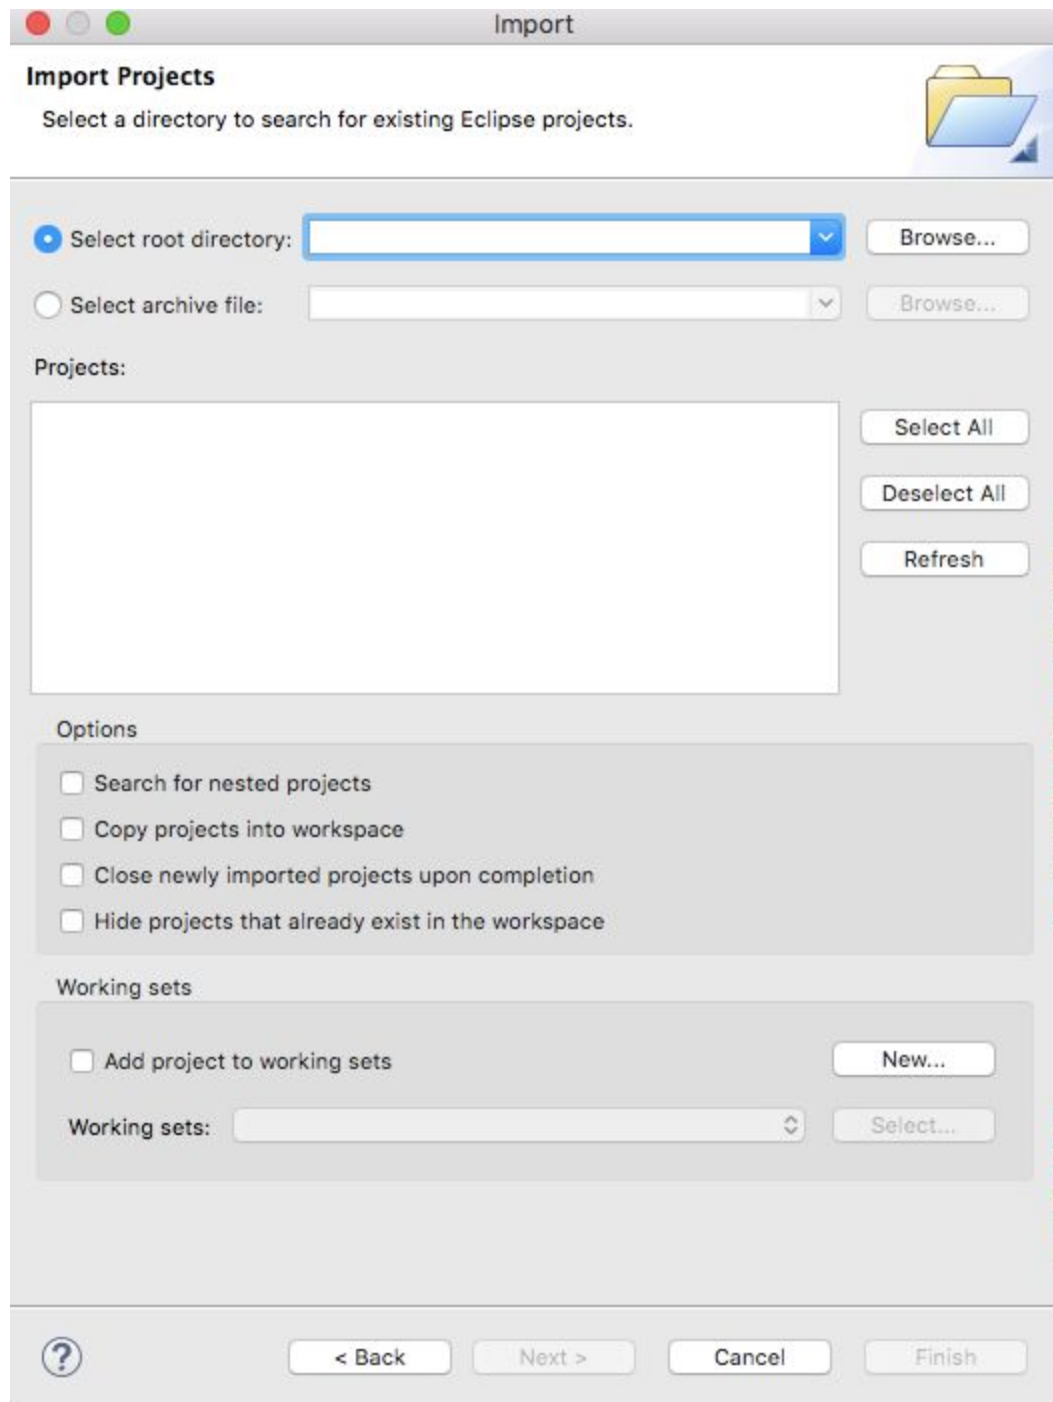

Train Reminder Text App Read me

To run the app, clone the GitHub Repo <https://github.com/UPenn-CIT599/final-project-train-status> and import it into your eclipse working directory.

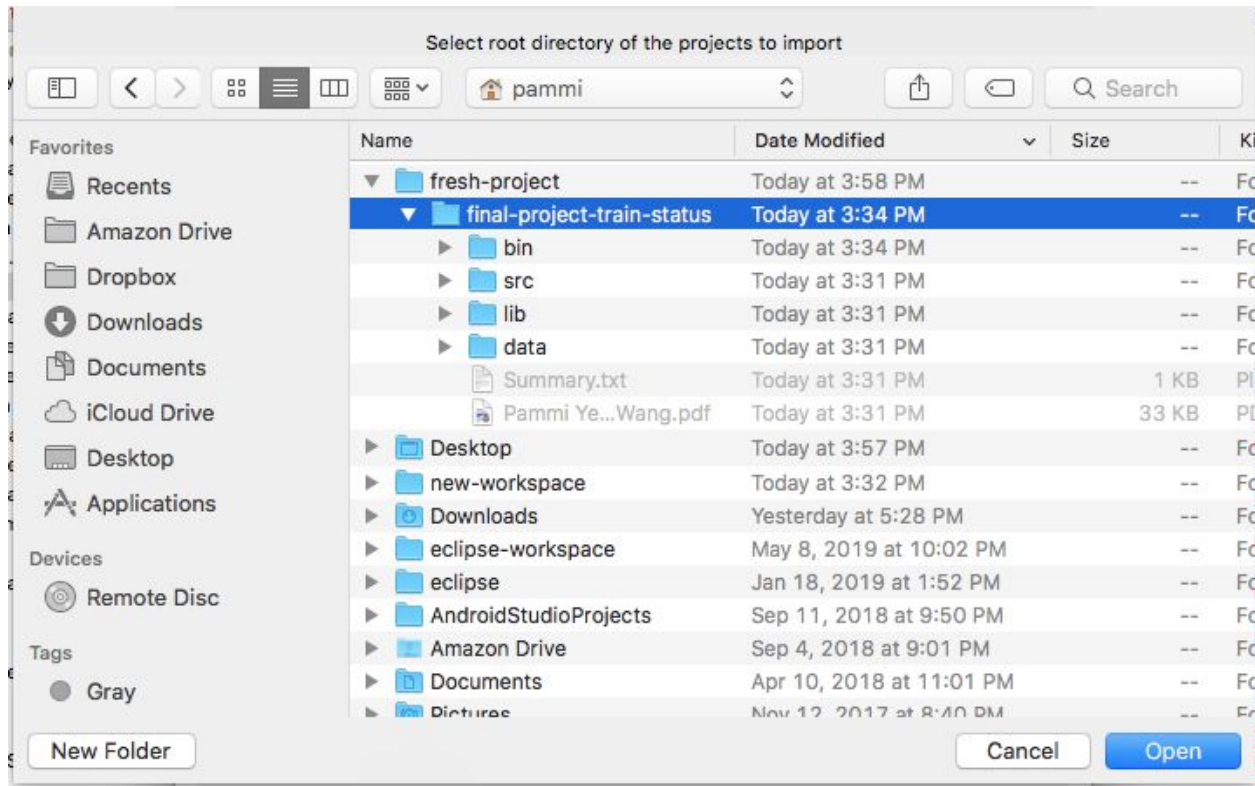

In Eclipse, select File>Import>General>Existing Projects into Workspace

In the next step, choose “final-project-train-status” which was just cloned

Then navigate to the src folder and select all files, hit Open

Environment variables:

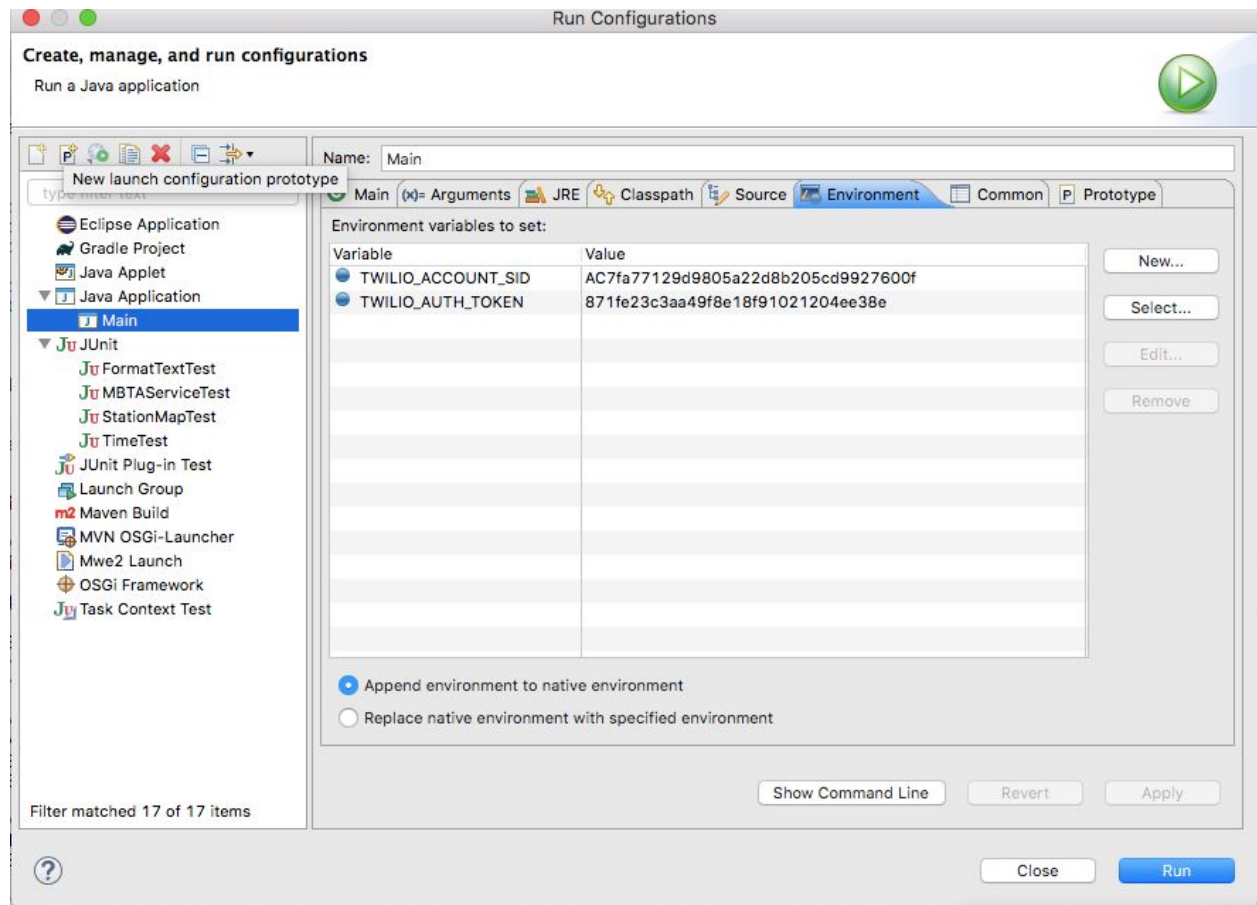

You need to set up a couple of environment variables in the Main run configuration in order for the Twilio API to work.

Select Run> Run Configurations. Select Environment on the horizontal bar. Then select Main in the list on the left. You should see an “New” button. Press “New” and add these two variables used as credentials to use Twilio’s test sending account:

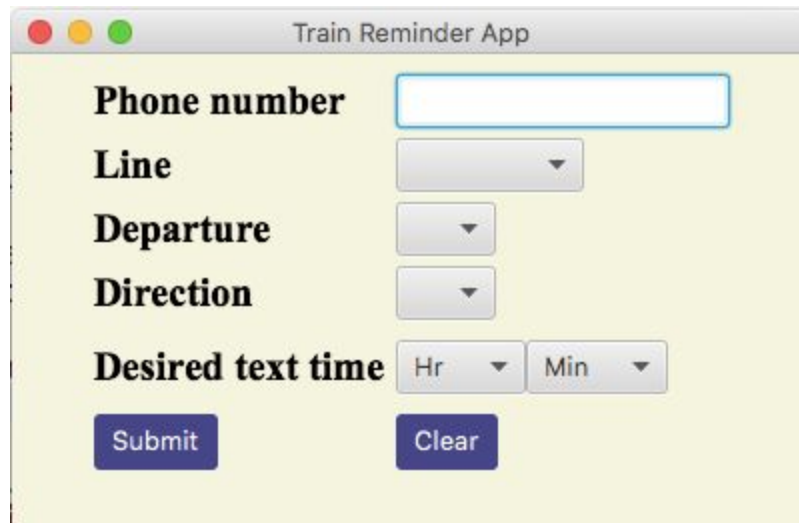

TWILIO_ACCOUNT_SID: AC7fa77129d9805a22d8b205cd9927600f

TWILIO_AUTH_TOKEN: 871fe23c3aa49f8e18f91021204ee38e

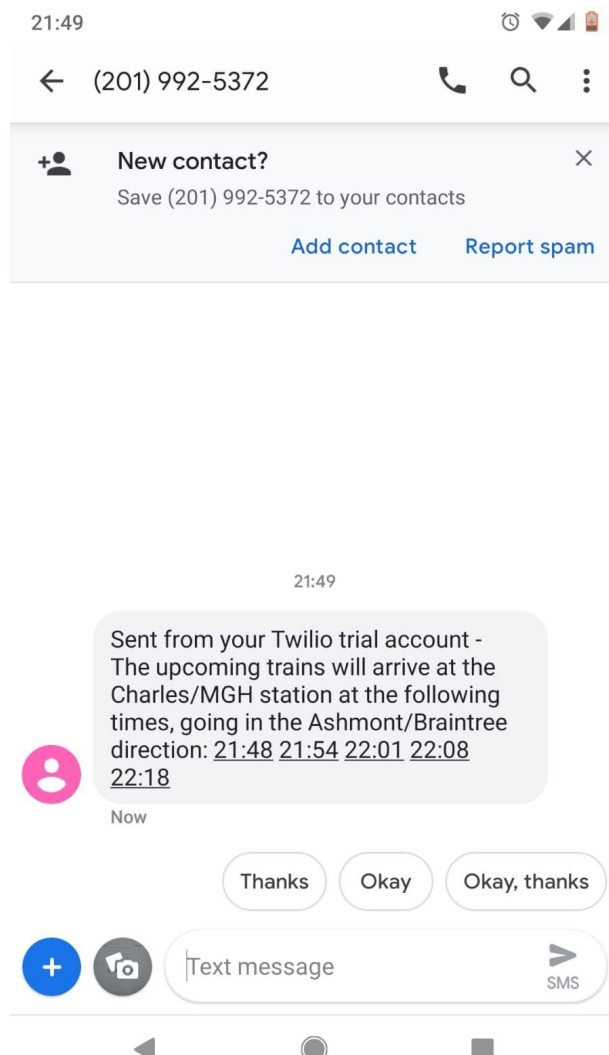

Hit Run

You should see a GUI pop up and you can start using the app!

Put in your phone number e.g. 8571234567 and select the values for Line, Departure, Direction, and Desired text time using the drop down buttons. You can expect to receive a text from the phone number (201) 992-5372, which is our Twilio account's number.

When the program exits, you will also stops receiving texts.
